

HEALING US

a documentary about our healthcare system & how we move forward together

NARRATED BY SUSAN SARANDON

You're invited to a screening of the new film, "Healing US" about the struggle for universal healthcare in the United States. The screening will be followed by a panel discussion, including the creators of the film, experts in the field and organizers in the movement for universal healthcare.

ABOUT

Join us to discuss how we're organizing to make Healthcare a Human Right.

- 68,000+ Americans will die this year due to lack of adequate healthcare.
- 500,000+ families will file for bankruptcy due to medical expenses.

These numbers only represent a fraction of the trauma that millions of people experience everyday in the American for-profit healthcare industry. Yet over 70% of Americans support switching to a universal healthcare system. Healing Us stands as the final case for American healthcare to be free and accessible to all.
